To Whom It May Concern,

I have had the pleasure of working with Flagship Imagery on numerous large-scale projects. Notable clients include Novartis Pharmaceuticals AG and Pfizer, Inc.

Within these projects, Flagship Imagery was responsible for creative, technical, and information architecture. In all instances Flagship Imagery performed well above my expectations and those of the client. Without exception, deliverables were received within financial designation and well before deadline.

Brad Golden and Rebecca Larsen possess skills that many vendors lack. Most notably, they have the ability to translate abstract concepts into creative and comprehensive products.

If you have any questions regarding my professional experience with Flagship Imagery, please feel free to contact me directly,

Most Sincerely,

A handwritten signature in black ink, appearing to read "T. van Mierlo".
